MISTRAL

INTERNET
BASED VIDEO

STREAMING
2012 - 2013

Watching television via internet needs a buffer of up to 30 seconds on the client side, a major issue for broadcasts such as live sports.

V-FORCE

4K UHD VIDEO
STREAMING
ON MULTIPLE SCREENS

2014 - 2015

Both quantity and quality of video streaming have increased rapidly - the development of 4K UHD and HEVC algorithms will

further reinforce this trend 6
